TERMINAL DISCLAIMER UNDER 37 CFR 1.321

Assignee, Carl Freudenberg KG, is the owner of 100 percent interest in the captioned patent application (hereinafter "the present application").

Pursuant to 37 CFR 3.73(b), the assignment of the present application from the inventors, or chain of title from the inventors, to the Assignee was recorded in the Patent and Trademark Office at Reel 015066, Frame 0660, on March 4, 2004, and the assignment attached as Exhibit A was recorded at the U.S. Patent and Trademark Office on October 26, 2006 via Electronic Patent Assignment System (EPAS) and the Reel and Frame are not yet available.

Also, pursuant to 37 CFR 3.73(b), the undersigned has reviewed all the evidentiary documents accompanying or referred to in this Terminal Disclaimer and, to the best of the undersigned's knowledge and belief, certifies that title is in the Assignee.

Assignee, through its attorneys and agents, hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the present application that would extend beyond the expiration date of the full statutory term defined in 35 USC 154 to 156 and 173 of any U.S. patent granted on pending Application No. 10/371,815, filed on February 21, 2003, (hereinafter "the second patent"), as shortened by any terminal disclaimer filed prior to the grant of the second patent. Assignee, through its attorneys and agents, further agrees that any

patent granted on the present application shall be enforceable only for and during such period that its legal title is the same as the legal title to the second patent, this agreement to run with any patent granted on the present application and to be binding upon the grantee, its successors, and assigns.

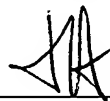

In making the above disclaimer, Assignee does not disclaim the terminal part of any patent granted on the present application that would extend to the expiration date of the full statutory term of the second patent as defined in 35 USC 154 to 156 and 173 in the event the second patent terminates prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer filed prior to the grant of the patent. Examples of such non-applicable termination of the patent granted on the second patent are as follows: (1) second patent expires for failure to pay a maintenance fee, (2) second patent is held unenforceable, (3) second patent is found invalid by a court of competent jurisdiction, (4) second patent is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321, (5) second patent has all claims canceled by a reexamination certificate or reissuance, and (6) second patent is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.

In making this disclaimer, Assignee reserves the right to extend the term of any patent granted on the present application for a period of delay, in the event the delay is defined by statute and/or regulation as allowing, or providing for, an extension of term. This right is reserved in the event the second patent terminates, or does not terminate, prior to the expiration of its full statutory term. Examples of such a delay include regulatory delay, and delay due to appellate review.

The undersigned is empowered to act on behalf of the Assignee.

The Commissioner is hereby authorized to charge to Deposit Account 12-1216 the fee of \$130.00 set forth in 37 CFR 1.20(d). A duplicate copy of this document is enclosed herewith for that purpose.

Respectfully submitted,
